# Winter Wine

## Description:

Created with tart, bright red Door County Montmorency cherries, this semi-sweet mulled wine will delight you with its deep, rich taste and a smooth lingering finish. Serve chilled or gently warmed for those cold winter nights.

## Production Method:

Cherry juice is fermented in stainless steel. Natural spice flavors are added.

## Pairings:

Enjoy this wine as dessert! Winter Wine pairs well with your favorite holiday desserts, and especially well with cinnamon and chocolate treats.

## Inspiration:

Given our unhealthy dose of obsession with the cold, we thought it best to whip up a batch of warming Door County cherry Winter Wine seasoned with spices, cinnamon, a hint of orange, and clove. Heat Winter Wine in a pot on the stove (or cup in the microwave) to a steamy level, but don't let the alcohol boil away into the atmosphere. The air isn't the one that should enjoy the alcohol!
